Franna MAC 14 Gross Vehicle Mass (GVM) Limits

To Whom It May Concern:

With the introduction of the diesel fuel rebate in the new taxation system, we have been asked for the manufacturers GVM rating for our MAC 14 Crane.

The MAC 14 crane has nominal production tare weights of:

Front Axle	6000 kg	6000 kg
Rear Axle	9000 kg	10000 kg (Optional CW)
TOTAL	15000 kg	16000 kg (Optional CW)

The suspension and driveline components used in the design have rated capacities to allow for laden weights of:

Front Axle	10000 kg
Rear Axle	10500 kg
TOTAL	20500 kg

Hence the allowable Gross Vehicle Mass (GVM) is **20 500 kg**.

Note: Before using your crane to these GVM limits on the road, please check that your excess mass permit allows for this - some additional charges might be required.

Should you require any further information, please don't hesitate to contact us.

Kind Regards,

Danny Black
