

PORT HANDLING

LET'S HANDLE IT!

FUCHS®

A TEREX BRAND

Fuchs has a wide range of material handlers that are powerful solutions for port handling.

Offering a variety of mobile, crawler and stationary undercarriage versions as well as various equipment combinations, attachments and quick coupling systems, Fuchs material handlers can be tailored for almost any application.

ATTACHMENTS AND LOADING EQUIPMENT

- Dipperstick for cactus or clamshell grab
- Banana boom for extended reach over ship wall
- Pipe rupture valves with regeneration function as standard from the MHL360 to the F120 MH
- Grab rotation speed and pressure regulation via display
- Optimally arranged hydraulic pipes and hoses

UPPERCARRIAGE

- Separated cooling system for engine, hydraulic oil and AC condenser
- Demand driven, temperature-dependent fan drives
- Well tuned 2-circuit hydraulics ensure fast, precise and powerful work cycles and maximum handling performance
- Rear and side view camera and additional display

CABIN

- Vertically and horizontally adjustable cabin*
- Large skylight
- Sliding window in cab door
- Safety glass
- Automatic air conditioning system

SERVICE PLATFORM

- Convenient access to engine, main hydraulic valve block, diesel, DEF tank etc
- Secure place for carrying out service
- Unique in the market

ENGINE

Diesel engine

- Best-in-class for economic fuel consumption in its power segment
- Latest U.S. Tier 4/ EU- Stage V emission technology
- Rest of world solutions
- Covered and protected EAT system

Electric motor

- Low maintenance and operating costs
- Minimum noise
- Zero local emissions

UNDERCARRIAGE

- Mobile, crawler, rail-car or stationary

**THE BEGINNING OF A
NEW ERA
F120
MH**

ATTACHMENTS AND LOADING EQUIPMENT

- Robust and FEM-optimised loading device, designed for heavy-duty material handling applications
- Banana boom for an optimised range curve, which greatly facilitates the unloading of bulk carriers and barges
- Hydraulic installation designed for material handling, with mostly durable piping being used
- Hose rupture safety valves on all-working cylinders, while boom and stick cylinders also have hydraulic regeneration for enhanced efficiency and safety in every application
- Tool control: oil flowrate and pressures for attachments individually adjustable
- Blue Hybrid System: Storage of surplus energy during lowering of the loading equipment in accumulators, which can be used during the next loadcycle

UPPERCARRIAGE

- High-performance cooling systems, with separate coolers for the engine, the hydraulic oil and air conditioning
- Fans with thermostatic control, ensuring temperatures consistently remain within the optimal range. This prolongs their lifespan and helps to reduce operating costs.
- Highly efficient mobile hydraulics
- Rear view and side camera

UNDERCARRIAGE

- Mobile *
- Crawler
- Portal *
- Rail-car *

CAB

- Fuchs comfort cab
- Large panoramic ceiling for an optimal overhead visibility
- Wiper arms and motors out of the field of view
- Automatic climate control
- Large port comfort oder marina comfort cab *
- Various cab lifting systems available

DRIVE

- Blue Hybrid System reduces fuel consumption up to 35%. The system power of 670 hp ensures energy-efficient loading cycles, maximum handling performance and increases productivity

Diesel engine

- Low emissions thanks to state-of-the-art EU Stage 5 exhaust gas cleaning system
- Best-in-class fuel consumption
- Exhaust system incl. DPF's are optimally protected against mechanical damage
- Extended oil service period

Electric motor

- Low operating costs
- Minimum noise
- ZERO local emissions

FUCHS SERVICE PLATFORM

- Unique in the market
- Gantry machine: Service platform access via catwalk
- Secure place for carrying out service
- Convenient access to engine compartment, Fuchs Hybrid system components, main control block, central lubrication system, air filter, tanks and much more.
- Generous maintenance flaps made of sheet steel with gas spring
- Maintenance work can be completed quickly, safely and comfortably

FUCHS PROGRAMME

CATERS FOR THE WIDE RANGE OF APPLICATIONS IN PORT LOGISTICS

GREAT FEATURES COME STANDARD WITH YOUR FUCHS

HYDRAULIC PIPES

Metal pipes, great longevity

SEPARATED COOLING SYSTEM

For engine and hydraulic oil coolers

DUAL-EAR PIN CONNECTION

Optimal distribution of force, high longevity, less wear and tear

QUICK FUSE CHECK BUTTON

Fuses can be checked quickly and easily

HOSE RUPTURE SAFETY VALVES

Hose rupture safety valves with regeneration function as standard from the MHL360 to the F120 MH

CONTROL DISPLAY

Touchscreen LCD display: the dashboard provides all important information at a glance

OIL PRESSURE AND FLOW ADJUSTMENT

Parameters can be easily fine-tuned to your personal preference

SLEWING RING

Internally geared double row slewing ring bearing, greasing via automatic lubrication system

SPECIAL OPTIONS FOR PORT APPLICATIONS

BANANA BOOM
Extended reach over ship wall

HIGH PRESSURE FILTRATION SYSTEM FOR ATTACHMENTS
Effective protection against contamination of hydraulic oil caused by damaged or leaking attachments monitored on the display

TRIPLE GROUSER PLATE
Suitable for challenging ground conditions

SINGLE TYRES
Maximum ground clearance

ELECTRIC DRIVEN MATERIAL HANDLER

Electric drives are today's forward-looking trend. This is particularly the case with indoor applications, stationary machines and machines with rail undercarriage, in which powerful zero-emission electric drives have very tangible advantages. They include low operating and servicing costs and low noise emissions. The extensive use of standard components from our range of diesel driven models ensure that spare parts are widely available.

Thanks to the Power Pack, users of electric driven material handlers gain greater flexibility. The Power Pack allows electric material handlers to be driven from one power socket to the other, independently of any external electricity supply.

The right connection, every single time: the cable lengths and reel designs of Fuchs electric machines are adapted to customer's specific needs, in line with the required range and the available connection options on site.

ZERO EMISSIONS

No exhaust gases, little noise and very little heat output: ideal features when operating indoors or close to residential areas.

MHL350

DIESEL ENGINE

- U.S. Tier 4 / EU Stage V
- U.S. Tier 3 */ EU Stage IIIA *
- Deutz 6.1 L6 / TCD2013 L6

PROFESIONAL CUSTOMER SUPPORT

Anyone who opts for first-class products can also expect first-class service before and after making a purchase. At Fuchs, not only are the loading machines optimally tailored to the needs of the customers, but the services are too. So you can be sure that your Fuchs loading machine will provide you with the reliability you need.

A regularly trained team of service specialists, comprehensive technical documentation and useful online tools through to mobile service containers support our distributors worldwide in the fast and competent implementation of assembly, maintenance and repair work. In urgent cases, a hotline and service websites are available to the service partners outside of normal business hours.

EDUCATION, TRAINING AND WORKSHOPS

The Fuchs global service network is the interface between distributors and the manufacturer. Highly qualified consultants and technicians are available to users to answer all questions about the Fuchs loading machines. They are supported by a sophisticated training and workshop programme in the Fuchs training centre, which is used by hundreds of international participants every year. Our professionally trained service technicians maintain contact with the service partners and support them in solving particularly demanding tasks.

FAST SPARE PARTS SERVICE

If help is needed it has to happen quickly. That is why the Terex has set up state-of-the-art spare parts warehouses around the world, which dispatch tens of thousands of shipments per year. Thanks to the Terex Connected Dealer Inventory System, all of our participating business partners have access to hundreds of thousands of spare parts worldwide.
