Franna AT-15 Gross Vehicle Mass (GVM) Limits

To Whom It May Concern:

With the introduction of the diesel fuel rebate in the new taxation system, we have been asked for the manufacturers GVM rating for our AT-15 Crane.

The AT-15 crane has nominal production tare weights of:

Front Axle	6000 kg
Rear Axle	10000 kg
TOTAL	16000 kg

The suspension and driveline components used in the design have rated capacities to allow for laden weights of:

Front Axle	10000 kg
Rear Axle	10500 kg
TOTAL	20500 kg

Hence the allowable Gross Vehicle Mass (GVM) is **20 500 kg**.

Note: Before using your crane to these GVM limits on the road, please check that your excess mass permit allows for this - some additional charges might be required.

Should you require any further information, please don't hesitate to contact us.

Kind Regards,

Danny Black
Engineering Manager (B.E. Mech)
