

Runner Hook & Sheave Option

/// The new runner option has been designed to create a higher lift point when the crane is operating in an area of low head room. The runner is adjustable and is designed for use with a swivel hook or with a sheave on 1/2 falls.

Key benefits:

- ▶ Interchangeable between MAC 25 & AT 40 units with lower arm change
- ▶ Three configurations to gain hook height
- ▶ Runner with swivel hook – MRC 18t
- ▶ Runner with sheave 1/2 falls MRC 4.2t / 8.4t
- ▶ Easily retrofittable to existing machines
