

# Summary

**Project Name:** ECN Management

**Scope:** Implementing ECN changes to all applicable documents

**Software:** IsoDraw CAD Process, Creo Illustrate, Adobe Illustrator, Adobe Photoshop, Corel Suite, Creo, NX, Solidworks, Autodesk Inventor, Team center, EPDM, and Docware

## Scope:

- Whenever the changes made to parts, assemblies or drawings of a machine
- ECN will be released that needs to be incorporated to all our documents
- Creating & implementation of ECN's to Parts, Operator, and Service Manuals

## Process:

### Parts Manual

- Study & analyze the ECN's for changes & model applicability
- Download the drawings & the other relevant CAD models from team center
- Create Illustrations & BOM per engineering drawing
- Identify the supplier part numbers and assign Terex numbers, If any
- Hot spotting in Docware to create .SEN files
- Import all .tif, .xlsx & .SEN files to Docware
- Publish the documents in Docware and send the PDF copies to customer
- Implement the changes if there any feedback from customer & project closure

### OMM & Service Manual

- Study & analyze the ECN's for changes & model applicability
- Identify the section, topics need to be created or updated
- Create or Update the content and illustrations for respective topics & link
- Proofreading of the contents for grammar and format errors & Publish
