

## Used Equipment Registration

Equipment owners and dealers are required to register Terex Utilities equipment while the equipment is in their possession. This ensures any communications, such as important safety recalls, are directed to the current owner.

The Aerial ANSI A92.2 and Digger Derrick ANSI A10.31 standards require the owner to register the machine within 60 days. If a Broker is involved in the sale, they are to ensure the manuals are included with the machine and that all parties are aware of their responsibilities.

To register your unit copy, complete the form below and email it to:  
[utilities.warranty@terex.com](mailto:utilities.warranty@terex.com).

Or fax a copy to 605-882-5579.

If you have any questions about outstanding bulletins on your machine call 844-837-3948 and ask for Technical Service or the Warranty department.
