PRODUCT ADVISORY

PA-651-17

DATE: 3/1/17

REVISED:

TO: Owners, Users, Dealers, and Installers

Models Affected: All Aerial Devices

SUBJECT: *Vehicle-Mounted Elevating and Rotating Aerial Device*
ANSI/SAIA A92.2-2015

Issue:

ANSI/SAIA A92.2-2015 – Vehicle-Mounted Elevating and Rotating Aerial Device

The ANSI standard which applies to Aerial Devices has been revised. ANSI/SAIA A92.2-2015 became effective June, 2016. This version supersedes all previously issued ANSI A92.2 standards. The standard has requirements for everyone involved in Aerial Device design, manufacture, installation, maintenance, ownership, use, and operation. This version replaces all previous versions for the responsibilities of; installer, owner, user, operator, lessee or lessor and broker. Machines manufactured under previous ANSI standards do not have to be updated, but the Responsibilities of the: Installers, Owners, Users, Operators, Lessors or Lessees, and Brokers require compliance with this current version.

Failure to comply with your required responsibilities in the maintenance, safe use, and operation of the Aerial Device could result in Death or Serious Injury.

Action:

It is advisable to obtain a copy of the newly revised standard to determine what is required for you and your company to comply to the standard. This standard applies to maintenance, use, and operation of Aerial Devices made under all previous ANSI A92.2 standards. Read the standard to determine how you will be affected.

A copy can be purchased by going to the ANSI web site below. You can order a paper copy or download by selecting "ANSI/SAIA A92.2-2015" and it will lead you through the process to use your credit card to purchase and then download a PDF copy of the standard to your computer:

<http://webstore.ansi.org/RecordDetail.aspx?sku=ANSI%2FSAIA+A92.2-2015>

The ANSI/SAIA A92.2-2015 Manual of Responsibility contains the responsibilities of the Installer, Owner, User, Operator, Lessors or Lessees, and Brokers plus dielectric test information. It can be ordered from the ANSI web site shown above or from Terex Utilities dealers under part number 494633.

Some changes in ANSI/SAIA A92.2-2015 from the previous, 2009 version are in sections:

1. Scope, Purpose, Requirements, Applications and Exceptions.
7. Responsibilities of Dealers and Installers.
8. Responsibilities of Owners:
9. Responsibility of Users:
10. Responsibilities of Operators:
11. Responsibilities of Lessors or Lessees.
12. Responsibilities of Brokers.

One significant change users will notice is the operation of the lower controls now requires an unlocking or enable device prior to boom operation.

Everyone involved with Digger Derricks (ANSI/ASSE A10.31-2013) or Vehicle Mounted Aerial Devices (ANSI/SIA A92.2-2015) need to read, study, understand, and comply with the current ANSI standards and OSHA regulations.
