PRESS RELEASE

TEREX® MINERALS PROCESSING SYSTEMS EXHIBIT AT HILLHEAD

**TEREX® MINERALS PROCESSING SYSTEMS, (TEREX MPS), 32 Farlough Road,
Dungannon, Country Tyrone, N Ireland**

Terex Minerals Processing Systems is delighted to be exhibiting at the upcoming Hillhead Show in June.

Geoff Beattie, Sales Director for Terex MPS said “Hillhead has always been a great show for us. We not only have UK customers visiting the booth but many international visitors as well. We are always pleased to return to Hillhead to show the breadth of our product portfolio. In addition, we have a good story to tell regarding new products, innovations and technology”

Terex MPS will be promoting and doing the global launch of its NEW Modular Recycling Jaw the MJ400R and also the TSV6203 screen.

The MJ400R is a great addition to the Modular Product Portfolio currently in existence. The key to this product is the industry leading access we have built into the design of this new modular jaw. It brings customers a well proven, cost effective and durable machine in a modular all-electric format with ‘no crawl maintenance access’ to the chamber.

The MJ400R has the Terex TJ2844R single toggle jaw crusher with renowned hydraulic overload protection as standard. It has a fully galvanized steel structure including walkways, steps, guardrails and product conveyor and CE compliant.

This is ideal for C & D recycling applications as well as quarry and mines and integrates well with established systems or working independently.

Also on display will be the renowned TSV6203. The revolutionary LJ-TSV increases production and handles applications not possible with traditional horizontal screens because it combines the efficient, high g-force El-Jay™ oval stroke motion with variable slope operation to handle larger deck loads. The screen adjusts up to 10° in 2.5° increments to best fit the application and optional bottom deck deflector plates increase efficiency.

The LJ-TSV with its variable slope operation gives customers a product that handles more applications than other screens on the market. The increased capabilities, higher production, enhanced durability and ease of maintenance of the LJ-TSV make it an industry leader.
